

YUSUF HAKEEM

Software Developer

Manama, Bahrain | yusuf.hakeem.bh@gmail.com | +973 6666 9795 | linkedin.com/in/yusuf-hakeem-bh | github.com/ysa7799

PROFESSIONAL SUMMARY

Software developer with a 400+ hour General Assembly Software Engineering Immersive and a public project portfolio spanning a REST API, a front-end web app, and a Python CLI. Comfortable across the stack: JavaScript, Node.js, Express, HTML/CSS, Python, and databases (MongoDB, SQL). Ten years of operations experience bring strong documentation discipline, reliability, and problem-solving. Based in Bahrain with the right to work - no visa sponsorship or relocation lead time - available to start immediately.

TECHNICAL SKILLS

Languages: JavaScript (ES6), Python, SQL, HTML5, CSS3

Backend: Node.js, Express, REST API design, input validation, JSON

Frontend: DOM manipulation, responsive design, single-page apps, localStorage

Data & tools: MongoDB, SQLite, Git/GitHub, automated testing, CLI development

Practices: Version control, unit testing, clean code structure, technical documentation

PROJECTS

Shift Log REST API — Node.js, Express

- Built a RESTful API with full CRUD, input validation, category/priority filtering, and correct HTTP status codes.
- Wrote an automated test suite (create, filter, update, delete, 404) - 100% passing; designed for a drop-in MongoDB swap.
- Repo: github.com/ysa7799/software-engineering-portfolio (shift-log-api)

Incident Report Web App — vanilla HTML, CSS, JavaScript

- Responsive single-page app to log, filter, and manage incidents; live search and a running high-priority count.
- Client-side state persisted with localStorage; zero dependencies, clean separation of structure, style, and behaviour.

Visitor Check-in Register — Python CLI

- Command-line visitor register with JSON persistence and defensive logic preventing invalid double check-out.
- Unit-tested core behaviour; pure standard library, runs anywhere Python does.

EXPERIENCE

Software Engineering Immersive (400+ hours), General Assembly, Bahrain

June 2023 - September 2023

- Completed 400+ hours building data-driven web applications and APIs with JavaScript, Node.js, and MongoDB.
- Practiced full-cycle development: data modeling, building, debugging, testing, and documentation.

Security Operator (Operations & Reporting), G4S, Bahrain

January 2014 - Present

- Maintained accurate, auditable records over 10+ years - the documentation discipline that carries into clean, maintainable code.
- Tracked recurring patterns and coordinated response under pressure - structured problem-solving applied daily.

EDUCATION

Bachelor of Business Administration (BBA), Arab Open University, Bahrain, 2014 - 2017

Data Analytics Program (Part-Time), General Assembly, Bahrain, 2025 - 2026
